**VACANT LAND 1971**  
**WITHIN THE GREENBELT**

# TABLE OF CONTENTS

BACKGROUND

CENSUS TRACTS & TABLES..... PP. I to II2

REFERENCE MAP..... P. II3

AGGREGATE.....P. II4

## BACKGROUND

This study was carried out on all vacant parcels of land inside the outer limits of the greenbelt which were greater than one acre in size. The objective was to estimate the total number of acres of vacant land (proposed for urban purposes) by proposed use, i.e. residential, commercial, industrial, transportation, government, open space, both privately and federally owned and to estimate future population and households.

Field surveys were carried out in the summer of 1971 to locate parcels of land and development was recorded. A map was prepared showing vacant land and acreages were calculated from the map using planimeter. Proposed uses of each parcel were determined primarily from local plans.

The vacant parcels were recorded by census tracts. Three areas were located outside census tracts: they were the Blackburn Hamlet Area, the Ottawa Airport Area and Russell Road Area. The information is presented in this volume by census tract. Where no census tract number appears in this volume e.g. CT 34, no land was vacant on the date of the

survey. A numbering system was set up with the first number referring to the census tract and the second number identifying the parcel within the census tract.

The proposed uses of vacant land were defined as follows:-

residential-sites where housing and community facilities were proposed.

commercial-sites where major commercial uses were proposed.

industrial-sites where industrial activities were proposed. Industrial activities include manufacturing, warehousing, construction.

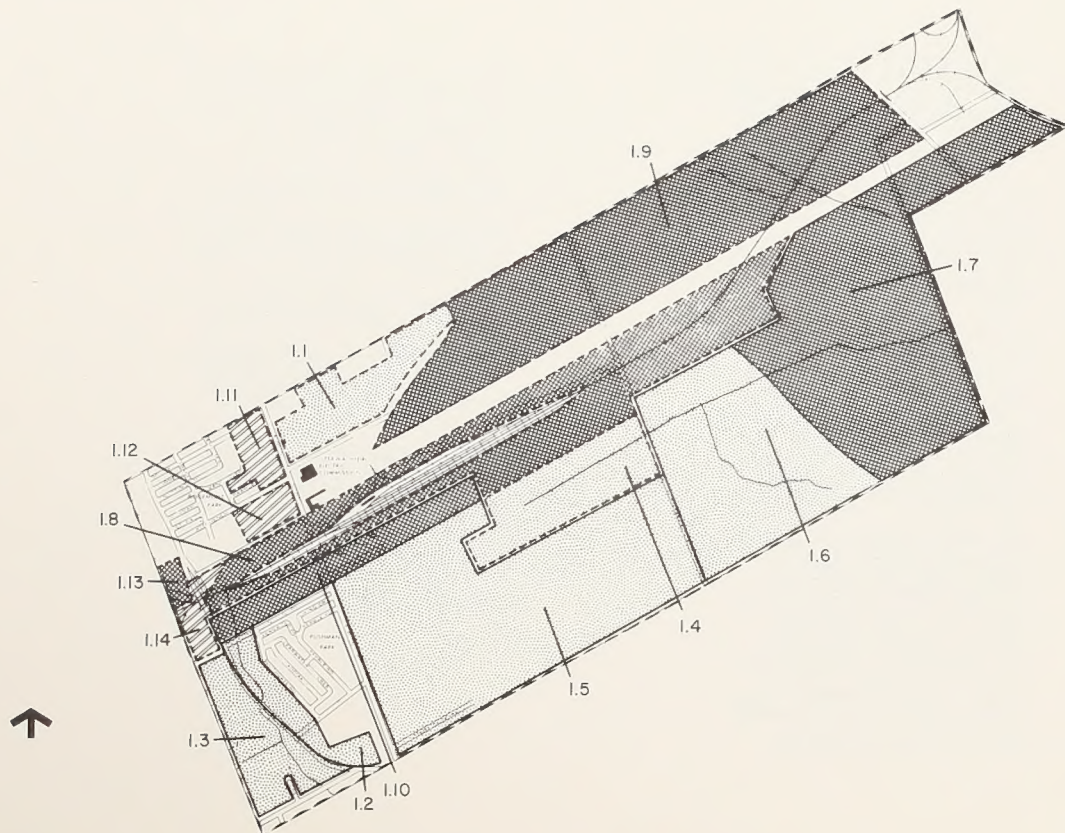

transportation-major potential transportation corridors identified in previous studies.

government-land owned by Federal Government and proposed for future federal needs.

open space-land reserved for recreation and conservation.
